This is an individual project. The goals of this project are to increase our intrapersonal intelligence (to know ourselves better) and to consider and celebrate aspects of our personalities that will influence our work as collaborating school librarians. Sharing our personal characteristics will help us build our classroom community. This learning experience may also help us form and achieve effective partnerships for class projects this semester. This mini-project will also give you the opportunity to use your creativity and to experiment with Web 2.0 tools.
